WELCOME NOTE

Dear Colleagues,

It is my great pleasure to greet you at the beginning of the “Eleventh Belgrade Summit of Interventional Cardiologists (BASICS+ 2017)” which will be held from April 10-11, 2017, at the Hotel M “Best Western” in Belgrade.

This traditional interventional congress continues with the implementation of ideas that we had from the beginning and that include live transmissions of complex coronary procedures which will demonstrate the meaning of the optimal drug eluting stent and bioresorbable scaffold in complex coronary lesions.

The meeting maintains its format with “State of the Art” lectures given by experts in the field.

This year we have the support of all interventional cardiology centers in Serbia, as well as many centers in the region.

We greatly appreciate support of the industry in interventional cardiology, pharmaceutical companies, Radio television of Serbia which organizes live transmission, and technical support of the event, and “Telekom Serbia” that provides us high-quality audio-video links required for the transmission.

The Meeting will take place in Belgrade, Hotel M “Best Western”. It combines a comfortable accommodation solution with a large and efficient Congress Centre.

Welcome to Belgrade.

Professor Siniša Stojković, MD, PhD, FESC

President of the Working group on catheterization and percutaneous coronary intervention of the Cardiology Society of Serbia

Professor Zoran Perišić, MD, PhD, FESC

President elect of the Working group on catheterization and percutaneous coronary intervention of the Cardiology Society of Serbia

Professor Goran Stanković, MD, PhD, FESC

Corresponding member of the Serbian Academy of Sciences and Arts
